PAULE MACEDO

Rio de Janeiro, RJ — Brazil • 29 years old • IT Intern or Junior IT Analyst

in/paulemacedo • +55 21 96907-9474 • paule.com.br • paulemacedo@outlook.com • /paulemacedo

Skills

Systems & Networking: Windows | Linux (Hardening) | Redes (TCP/IP, DNS) | APIs REST | Suporte N1/N2 & Troubleshooting
Development: Python | Bash | JavaScript (Node.js, React, Redux) | Java | SQL | Swagger/OpenAPI
Cybersecurity: AppSec | OWASP Top 10 | ISO 27001 | LGPD | Controles de Acesso (RBAC, JWT, CORS)
Tools & Hardware: Git | Insomnia | Wireshark | Debugging | Documentação | Manutenção de Hardware
Languages: English (C1 — Advanced) | Spanish (Elementary) | Portuguese (Native)

Professional Experience

Mobile Device Repair Technician **Axofix** *Rio de Janeiro, RJ, BR* **Jan 2023 — Present**

- Perform logical and physical diagnosis of smartphones and mobile devices, identifying root causes and ensuring device operational continuity.
- Execute preventive and corrective maintenance, including component replacement and board-level repairs, following technical procedures and quality standards.
- Provide direct customer support, documenting requests, managing the complete service workflow, and ensuring delivery within agreed timelines.

Software Engineer (Undergraduate Researcher) **RNP** *Rio de Janeiro, RJ, BR* **Jun 2023 — Sep 2024**

- Developed user profile templates for Immersive TV (HTML/CSS/JavaScript) and Virtual Reality (Unity/C#), deployed at 4+ national events and streamlining interaction for 200+ visitors.
- Universalized network port selection in the Ginga middleware, enabling stable connections across Windows, Linux, and macOS and eliminating hardware-specific dependencies.
- Validated communication via Insomnia and REST APIs between middleware and Oculus VR devices, ensuring integration integrity and data flow stability.
- Configured dual-boot (Ubuntu/Windows) on 3+ laptops and ensured operational continuity, reducing critical failures by 60% during live technical demonstrations.

Education

Bachelor of Science in Computer Science **Centro Universitário IBMR** *Rio de Janeiro, RJ, BR* **Expected Dec 2027**

- Academic transfer: CEFET-RJ (studied from 2019 to 2025).
- Relevant coursework: Algorithms & Data Structures, Object-Oriented Programming, Operating Systems, Computer Networks, Software Engineering, Databases, and Web Development.

Projects

- **Archemy** | Automação de Sistemas Linux (Bash)
  Bash tool for automating Arch Linux configurations with dotfiles, basic hardening, and operational maintenance support.
- **Byte de Sabor** | Aplicação Full-stack com controles de segurança
  Application built with React, Redux, MongoDB, and Node.js, featuring JWT authentication, bcrypt password hashing, RBAC, Swagger/OpenAPI documentation, and CORS policies.
- **UAV Path Planner** | Simulação de Algoritmos para Drones (Python)
  Python simulation comparing 2D and 3D Dijkstra algorithms for drones, analyzing energy consumption and time efficiency.

Additional Training

- **Cybersecurity Fundamentals** — Hackers do Bem — SENAI & Escola Superior de Redes (RNP) — 2024
- **Brazilian General Data Protection Law (LGPD)** — Fundação Bradesco — 2h
- **Certificate of English Language Proficiency C1 (Advanced)** — EF SET — Reading & Listening — May 2024

Publications

TV 3.0: A Ginga-NCL and Common Core Webservices Extension for Multidevice Support **Oct 2023**

SBC WebMedia

- Co-author of a technical paper on interoperability and communication between connected devices in TV 3.0, focusing on distributed systems architecture.
