

PAULE MACEDO

Rio de Janeiro, RJ — Brazil • IT Intern or Junior IT Analyst

in [in/paulemacedo](#) •  +55 21 96907-9474 •  [paule.com.br](#) •  paulemacedo@outlook.com •  [/paulemacedo](#)

Skills

Systems, Networking & Support: Windows | Linux | Networking Fundamentals | TCP/IP | DNS | HTTP/HTTPS | REST APIs | Troubleshooting | Suporte Técnico N1/N2

Programming & Web Development: Python | Bash / Shell Script | JavaScript | Java | SQL | Node.js | React | Redux | HTML5 | Swagger / OpenAPI

Information Security: Cybersecurity | Application Security (AppSec) | OWASP Top 10 | Hardening | LGPD | JWT | bcrypt | RBAC | CORS

Tools & Maintenance: Git | Insomnia | Debugging | Documentação Técnica | Diagnóstico de Hardware | Substituição de Componentes

Languages: English (C1 — Advanced) | Spanish (Elementary) | Portuguese (Native)

Professional Experience

Mobile Device Repair Technician **Axofix** *Rio de Janeiro, RJ, BR* **Jan 2023 — Present**

- Perform logical and physical diagnosis of smartphones and mobile devices, identifying root causes and ensuring device operational continuity.
- Execute preventive and corrective maintenance, including component replacement and board-level repairs, following technical procedures and quality standards.
- Provide direct customer support, documenting requests, managing the complete service workflow, and ensuring delivery within agreed timelines.

Software Engineer (Undergraduate Researcher) **RNP** *Rio de Janeiro, RJ, BR* **Jun 2023 — Sep 2024**

- Developed user profile templates for Immersive TV (HTML/CSS/JavaScript) and Virtual Reality (Unity/C#), deployed at 4+ national events and streamlining interaction for 200+ visitors.
- Universalized network port selection in the Ginga middleware, enabling stable connections across Windows, Linux, and macOS and eliminating hardware-specific dependencies.
- Validated communication via Insomnia and REST APIs between middleware and Oculus VR devices, ensuring integration integrity and data flow stability.
- Configured dual-boot (Ubuntu/Windows) on 3+ laptops and ensured operational continuity, reducing critical failures by 60% during live technical demonstrations.

Education

Bachelor of Science in Computer Science **Centro Universitário IBMR** *Rio de Janeiro, RJ, BR* **Expected Dec 2027**

- Academic transfer: CEFET-RJ (studied from 2019 to 2025).
- Relevant coursework: Algorithms & Data Structures, Object-Oriented Programming, Operating Systems, Computer Networks, Software Engineering, Databases, and Web Development.

Projects

- **Archemy** | Automação de Sistemas Linux (Bash)
Bash tool for automating Arch Linux configurations with dotfiles, basic hardening, and operational maintenance support.
- **Byte de Sabor** | Aplicação Full-stack com controles de segurança
Application built with React, Redux, MongoDB, and Node.js, featuring JWT authentication, bcrypt password hashing, RBAC, Swagger/OpenAPI documentation, and CORS policies.
- **UAV Path Planner** | Simulação de Algoritmos para Drones (Python)
Python simulation comparing 2D and 3D Dijkstra algorithms for drones, analyzing energy consumption and time efficiency.

Additional Training

- **Cybersecurity Fundamentals** — Hackers do Bem — SENAI & Escola Superior de Redes (RNP) — 2024
- **Brazilian General Data Protection Law (LGPD)** — Fundação Bradesco — 2h
- **Certificate of English Language Proficiency C1 (Advanced)** — EF SET — Reading & Listening — May 2024

TV 3.0: A Ginga-NCL and Common Core Webservices Extension for Multidevice Support

Oct 2023

SBC WebMedia

- Co-author of a technical paper on interoperability and communication between connected devices in TV 3.0, focusing on distributed systems architecture.
- DOI: 10.5753/webmedia_estendido.2023.236105
